

Final Specification for High-Efficiency Lavatory (Bathroom Sink) Faucets

EPA released a final specification on October 1, 2007, for high-efficiency bathroom sink faucets and faucet accessories (e.g., aerators). Manufacturers that produce faucets and aerators meeting WaterSense efficiency and performance criteria can apply to have their products [certified](#) and earn the WaterSense label. Before submitting products for testing, manufacturers must have a partnership agreement with EPA in place.
