

Greybull rest area shuts down for WyDOT improvements

GREYBULL — A rest area improvement project is continuing in northwest Wyoming.

The Greybull Rest Area closes Jan. 20 until further notice, according to Erik Smith, Wyoming Department of Transportation resident engineer in Lander.

“The improvements to the Greybull facility will improve our ability to serve the public at the rest area in the future,” Smith said.

L.M. Olson, Inc., of Rawlins is the prime contractor on the \$2.2 million rest area improvement project. Improvements are under way at the Sweetwater Station Rest Area on U.S. 287 southeast of Lander and south of Riverton, Waltman Rest Area between Shoshoni and Casper on U.S. 20-26, and Gooseberry Rest Area on Wyoming 120 between Thermopolis and Meeteetse.

The rest area improvement project includes building demolition, additions and other upgrades to existing buildings, including mechanical, electrical and plumbing systems; and site improvements and modifications, including storm sewer, sidewalks, picnic arbor modifications, masonry, landscaping, playgrounds, and other work.

The rest area improvement project is being funded through the federal American Recovery and Reinvestment Act.

Completion date for the project is Aug. 27, 2010.
