

## **Ohio issues permit for new landfill at AMP power plant**

March 18 -- Ohio is issuing a permit to allow for the installation of a new landfill at AMP-Ohio's proposed coal-fired power plant in Letart Falls, Meigs County.

The landfill would accept fly ash, bottom ash and possibly gypsum from the power plant, according to the Ohio Environmental Protection Agency.

The 133-acre disposal area would have the capacity for approximately 27.4 million cubic yards of material. With an anticipated daily disposal rate of 2,200 tons per day, the site is expected to last 41 years, the Ohio EPA said.
